

# TECHNOLOGY

*The polypropylene pool is not self-supporting, so it is necessary to follow all the principles of safe concreting specified in the building preparations documentation.*

Filtration

Pump

Heat pump

Swim jet

Salt dispenser

Technology wall

Technology shaft

## Pool technology? What is that?

Pool technology is often nicknamed "the motor of the pool". It is not visible at first glance, but it keeps everything in operation. The circulation pump ensures the water circulation. Then there is sand filtration, which removes mechanical impurities from the pool water. This is followed by a water treatment unit, which keeps the pool water in perfect condition.

**Did you know that our product specialists are directly involved in the development of BRILIX pool equipment? We guarantee its quality!**

## What type of water treatment should you choose?

Water treatment helps to keep the pool clear and in great condition, with the crucial parameters in balance. The most popular is salt water treatment using a salt dispenser. From the salt water in the pool, the necessary amount of chlorine is produced in a natural concentration to clean the pool water. Salt dispensers have gained in popularity because they offer abundant options for extensions, such as automatic pH adjustment or smart pool technology control.

## Comfort? A top priority!

To make bathing as enjoyable as possible, we have designed swimming pools and technology with an emphasis on ease of operation and maintenance. In general, the more advanced the technology you choose, the less you will have to deal with. Interested in specific options? Just turn to the following pages.

## Where will it go?

To simplify selection, we have prepared the most popular pool technology combinations as standard solutions. The first option is a technology wall, which you can place, for example, in a garden house, cellar or garage. The other option is a technology shaft, in the ground immediately next to the pool. It is up to you to choose the option which suits you best.

# TECHNOLOGY WALLS

## Wide range of placement options

The most convenient access to the pool technology is provided by a technology wall. It can be installed in your garage or garden house. All the pool technology will be protected and easily accessible when necessary.

	BASIC PLUS	ECONOMIC	OXY	UV	STATION
